

Straight out of the GDAR Program!

Producing better cows generation after generation has been the goal of the GDAR program for nearly 70 years. GDAR cows are functional, fertile, easy fleshing, moderate framed, feminine, and possess the genetics to produce profit at every stage of the beef industry. This is the chance to put some of these females to work on your operation.

All of these heifers were raised right here at GDAR. Well over half of these heifers would be out of GDAR AI sires with the remainder being by GDAR bulls.

The group 1 heifers are off of the registered herd and papers are available for \$250/head.

Groups 2-4 are off of the commercial herd and nothing was held back, they all sell.

These heifers have a similar genetic package to the bulls selling, and all of the maternal excellence GDAR is known for.
